

## Replacing Ear Cushions for EP650 Bluetooth Headphones

### Tools you will need:

Screwdriver – flat head/slotted type

### Method:

The cushions are fixed via 4 clips (see image 1). Pull the black tape pieces to access the clips.

Use the screwdriver to unclip and open each clips (image 2). When opening the earpiece, be careful not to cut the internal wiring by pulling too much apart each pieces.

Rearrange the cushions.

Once positioned, press the clips together to close the ear pads again.
